Available

Come with us to live on the Moon!

Fly with us into the FIRST® LEGO® League Jr. upcoming season. In the MISSION MOONSM Challenge, teams will explore the challenges of living on the moon. What do you need to know about the Moon to live there? What will you eat and drink? How will you get energy? How will you breathe? What will you do for fun? What other problems will you have to solve?

Each year, FIRST LEGO League Jr. presents a new and exciting Challenge to ignite the creativity of youth age 6 to 10. Each team of up to 6 children begins the exploration of this real-world theme with an exclusive LEGO Education Inspire Model. Using this model as a starting point, they design a new model of their own with LEGO elements. As they work, they learn basic engineering and programming skills with LEGO Education WeDo 2.0 and apply those concepts to make their model move. Teams also document their work in an Engineering Notebook and share their journey through a team Show Me Poster. Throughout their experience, teams operate under the FIRST Core Values, celebrating discovery, teamwork, and Gracious Professionalism®.
